

PROJECT PROFILE

Owner:

ASiMI

Project Name:

Gas Reactor Skid Fabrication

Project Location:

Butte, MT

Technical Summary:

AsiMI has contracted with Bay-Tec to design and fabricate the instrumentation and control hardware for 41 gas reactor skids for their Vision 2000 project in Butte, Montana. A team of Foster-Wheeler, Kinetics, and Bay-Tec are responsible for delivering the skids to Butte.

Scope Responsibility:

Bay-Tec responsibility includes engineering & design inclusive of control panels, instrument specifications, conduit layouts, and installation details. Bay-Tec was also responsible for the complete installation of the instrumentation system inclusive of electrical, panels, instrumentation, and loop checks. Bay-Tec has met AsiMI's stringent quality standards while delivering 41 skids on an accelerated schedule.
